

Commercial Driver License

Restricted Driver License

Valid Without Photo

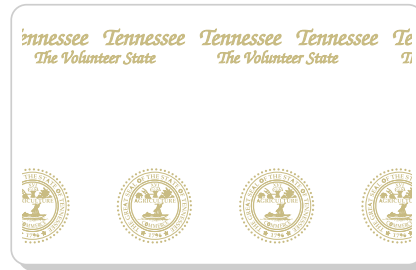

Handgun Carry Permit

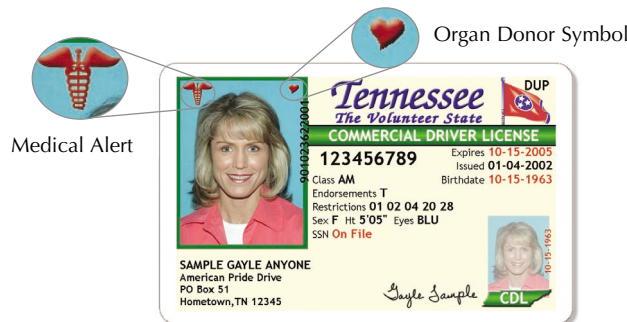

Features of New Licenses

- Portrait and signature are both digital and stored in a permanent database for easy retrieval in order to verify identification.
- Laminate coating on the front and back increases the card's durability, security and tamper resistance. On the front there is an "optically variable" pattern that changes color as one tilts the license for viewing.

Front Laminate

- All licenses have a ghost image, with birth date repeated along edge.
- The portrait has a receipt number overlapping its edge as well.
- The 2-D barcode on the back contains all of the data from the front of the license.
- If SSN is verified, the driver may choose to have it printed on license, or to have the phrase "On File" printed instead. If SSN not provided, this is stated.
- When appropriate, within the portrait border there may be either a medical alert or an organ donor symbol.

NEW License Documents
Coming Winter
2002-2003

**New Driver Licenses,
Identification Licenses,
and Handgun Carry Permits**

A NEW LOOK....

In the winter of 2002-2003, Tennessee will begin issuing new Driver Licenses, ID's and Handgun Carry Permits with a new look and a number of new security features.

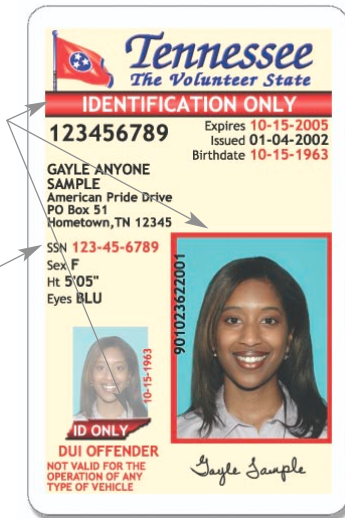

Previously issued Licenses, ID's and Permits will remain valid until their expiration date (shown for some licenses on the back, as part of a renewal sticker).

Driver Licenses and Identification Licenses may be issued with or without a photo. Handgun Carry Permits all have a photo.

Adult Driver License

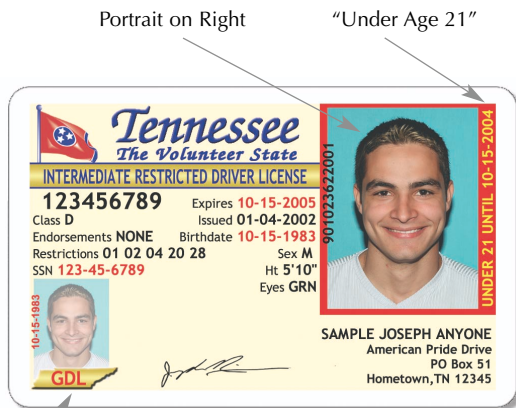

Identification License
